Summary

Because you got me paranoid
about AOL Drive. All I kept
seeing is an old steam locomotive
and ~~steam~~ it repeated over
& over showing me the wheel movement
& interlocking mechanism plus
head sounds of a train &

This session was muted with machine, grinding, clanging sparking on tracks, I am not using a monitor so stopping the session due to not moving off of a repeated, sounds + old steam locomotive + hearing brakes as they stop while I am writing this. This is either hugely wrong or it's okay.
